Coweta, United States

Profile

Dedicated and skilled Software Engineer with expertise in developing applications with C#, SQL, and JS/TS. Proficient in adapting to evolving software requirements and team collaboration.

Employment History

Petroleum Transportation Specialist at QuikTrip, Tulsa

06/2021–11/2023

Assisted in team strategy decisions to provide the best overall service to our stores at the best cost. Managed the companies third-party resources for fuel transportation and was the primary point of contact for daily operation issues that arise with the nearly 2,000 fuel deliveries each day.

Petroleum Supply Specialist at U.S. Army, Broken Arrow

06/2019–Present

Maintain a state of readiness at all times. Supervise and manage the reception, storage, and shipping of bulk or packaged petroleum-based products. Oversee its use, dispense it to various vehicles and aircraft, and make sure it is being transported and handled safely. Learn how refueling systems and equipment are assembled sequentially, perform quality assurance, and supply and store fuel from a variety of sources.

Software Engineer at QuikTrip, Tulsa

11/2023–Present
